

Moving to Inftran™ is much easier and quicker than you might think.

More than just migration.

The importance and reliance upon Managed File Transfer solutions within companies is growing at an extraordinary pace. A large number of companies are moving away from expensive incumbent file transfer solutions. Additionally, FTP and SFTP users are looking to implement a more secure and robust file transfer solution that offers them guaranteed delivery.

The good news is that a migration to Stonebranch's Inftran is not time consuming, risky or expensive. In fact, we can tell you up front how long the migration will take, how much it will cost and when you would expect to start receiving a return on your investment. Essentially, the analysis and migration tool from Stonebranch enables you to easily migrate to Inftran, our Intelligent File Transfer solution.

With this analysis and migration tool, you will get the following advantages:

- An immediate overview on all migration costs
- An analysis of when/if a migration to Inftran will provide a return on your investment
- No interruption of your running IT production
- Very low impact on cost, time and personnel
- Fast implementation and deployment

Our analysis and migration tool has two main functions:

Analysis

The analysis and evaluation of your existing file transfer product is of critical importance during the Inftran migration. It provides Stonebranch with a detailed list of all of your existing file transfer jobs. At the same time, our analysis tool will calculate the cost of converting to Inftran.

Migration

Stonebranch has extensive experience in replacing incumbent products. This knowledge has influenced the development of our automated migration tool. Its automatic process is designed to eliminate the errors and problems often seen during a manual migration processes. We guarantee a seamless migration to Inftran, allowing you to replace your existing file transfer solution very quickly with our Intelligent File Transfer solution.

Our Analysis and Migration Tool in Use

In the United Kingdom, a global insurance company decided to replace its existing file transfer product with Inftran. Within only a matter of a few weeks, Stonebranch had successfully completed the conversion of 2,500 file transfer jobs from Connect:Direct and FTP solutions to Inftran. This migration was across multiple platforms and did not cause any interruption to ongoing production. The migration was so successful that it has now been repeated in several other companies worldwide.

An Analysis of Cost Savings

We can very easily show you the cost savings that you receive by migrating to Inftran. We also provide you with a detailed roadmap of the migration process.

Our analysis considers the following areas:

- Migration
- Services
- Production
- Abends
- Maintenance

Our Intelligent File Transfer solution - Inftran

Inftran is the Managed File Transfer solution that fulfills all of your critical business requirements. Its centralized, proactive monitoring provides enterprise-wide visibility and the maximum possible time to address any technical issues should they arise. With Inftran, you can optimize the integration of data transfers with your business processes to avoid delays and enjoy consistently reliable processing.

Our highly scaleable solution guarantees fast, secure, cross-platform Managed File Transfer.
