

# Universal Automation Center

## Workload Automation that Delivers

### Intelligent Automation for the Modern Data Center

Imagine a modern, efficient automation solution to drive immediate business processing, manageable from any web-enabled device.

Universal Automation Center will allow you to automate your 21st century business processing, securely manage file transfers or extend a legacy scheduling solution throughout the enterprise. With the use of modern technology, it is now possible to achieve a more intelligent automation solution.

Whether your automation needs are simple or quite complex and cumbersome, the capabilities of Universal Automation Center can be managed using a 100% Web 2.0-based interface, where you can

automate these tasks into the cohesive workflow you've imagined. Enterprise-level businesses can now give the entire IT organization and business users complete system transparency, as well as operational control and insight. Use Universal Automation Center to reduce outages, ensure compliance and ease troubleshooting.

#### Universal Automation Center includes:

- Universal Controller
- Universal Agent (use with any scheduling engine)
- Universal Data Mover
- UDM Gateway

**Modern, innovative, enterprise workload automation that delivers business-initiated processing capabilities.**

**The capabilities of Universal Automation Center can be managed using a 100% Web 2.0-based interface, where you can automate these tasks into the cohesive workflow you've imagined.**
