

Xpress Conversion Tool (XCT)

The easy way to integrate and automate windows based tasks

When your process stops, are you aware?

Managing, controlling and automating the flow of business critical data and tasks doesn't have to be challenging, limited to local servers or time consuming. With Stonebranch Universal Automation Center (UAC) you can easily control your processes, decrease batch processing time and improve auditability.

Break down the limitations of your legacy Windows Task Scheduler and enable Enterprise Workload Automation easily by automatically converting your Windows Tasks with Stonebranch's Xpress Conversion Tool.

Eliminate the drawbacks of your Windows Task Scheduler

- Connect tasks in workflow sequences. Schedule and monitor entire processes
- Go beyond the local server with cross-server functionality
- Event triggered scheduling and processing time efficiencies
- Conditional processing based on completion status
- Calendar management with defined processing rules for vacation and business days
- Support for specific applications, such as SAP ERP or Microsoft SSIS ETL
- SOA-based architecture support
- Web interface

Automation made easy. The 4 steps of XCT:

- **FIND**
Find and collect task definitions of all servers via XCT
- **READ**
Read existing definitions via XCT
- **CONVERT**
Convert existing definitions to Universal Automation Center
- **LOAD**
Load the UAC files into Universal Controller

Stonebranch Universal Controller	Windows Scheduler
VISIBILITY	No Cross-server dependencies VISIBILITY
MONITORING	No central control of the process MONITORING
CENTRAL SCRIPT LIBRARY	Scripts are distributed over each servers CENTRAL SCRIPT LIBRARY
EVENT MANAGEMENT	No event based scheduling EVENT MANAGEMENT
WEB INTERFACE	Outdated fat client WEB INTERFACE
CALENDAR	No support for Calendar, vacations, business days CALENDAR
AUDITING	No Audit capabilities, who did what and when AUDITING
FILE TRANSFER	No file transfer solution FILE TRANSFER

The easy way to integrate and automate windows based tasks

Auditability

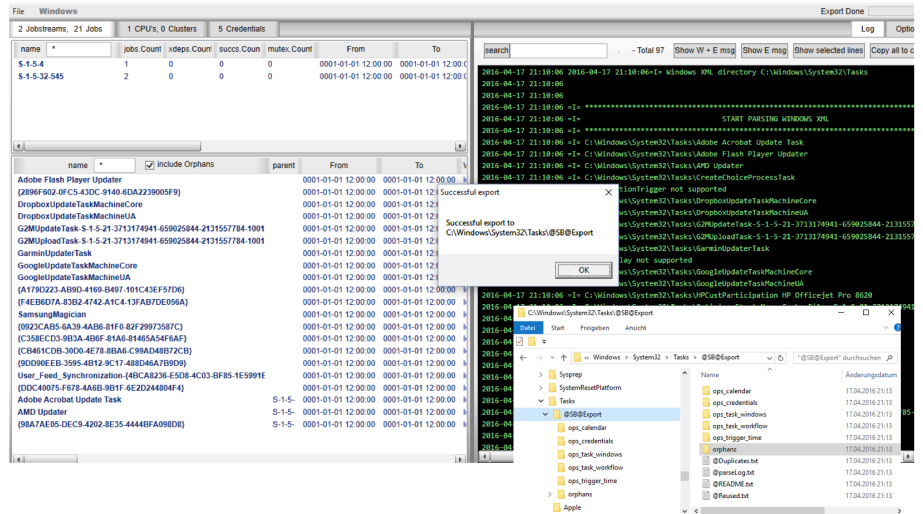

Universal Automation Center automatically tracks any configuration changes and let you create fully customizable Audit Trail Reports of your automation landscape. Supporting industry Audit Standards requested by HIPAA, SOX, GLBA.

The easy route to your Web-based enterprise automation solution

With Xpress Conversion Tool, the automatic transition of Windows Scheduling Solutions becomes a reality. No complex migration planning is required. Stonebranch's Xpress Conversion Tool enables you to convert all Windows Tasks to the Universal Automation Center simply, independently and automatically.

Decreased Batch Processing Time

UAC enables your organization to decrease batch processing time and optimize the use of computing resources by supporting event-based scheduling in combination with real-time resource control. Any logical combination of both, tailored to your individual needs and required to your business challenges is possible.

Advantages at a glance:

- **Single Point of Control**
 UAC real-time dashboard allows a centralized setup, control and monitoring of all business processes by a fully customizable Web-GUI
- **Self-Service Conversion**
 No need for heavy migration projects. XCT supports a fully self-service conversion of all existing Windows tasks
- **Decreased Batch Processing Time**
 Real-time resource control of event-based and time-based processes and tasks including critical path handling
- **Consolidated Automation**
 Unify all services, users and processes into a single, easy to manage solution
